ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: METHOD AND ARRANGEMENT RELATING TO X-RAY IMAGING

(57) Abstract: The present invention relates to a method and ar-
rangement for controlling exposure in an x-ray apparatus, for depict-
ing an object. The apparatus comprises an x-ray source and a dis-
placeable detector being arranged to move with a controllable speed
across an image exposure area. The method comprises the step of:
acquiring a signal relating to photons incident on at least a part of the
detector, comparing said acquired signal with a target value, and con-
trolling the speed of detector displacement with respect to the result
of the comparison.
